The average strength, on the register, of these categories should be ascertained by adding the two figures and dividing by 2.
- (b) The total number of man-shifts worked by the chipping and painting workers of the categories referred to in (a) during the month should be ascertained from the daily employment statistics.
- (c) The total number of man-days of authorised or unauthorised leave taken by the above workers should be ascertained. This figure should be divided by the number of working days in the month to ascertain the average number of workers away on leave.
- (d) The figures ascertained as in (c) should be deducted from the average obtained as in (a) to arrive at the effective strength of workers available during the month.
- (e) The figure of man-shifts ascertained under (b) should be divided by the effective strength ascertained as in (d). The figures arrived at will be the average number of days of employment during the month of October, 1955.
- (f) The above process should be repeated for the remaining 11 months from November, 1955 to September, 1956.
- (g) The average employment figures for the 12 months should be added and divided by 12.
- (h) The figures arrived at in (g) above should be fixed as the minimum number of days for which wages will be guaranteed for the following 12 months ending 30th September 1957.

The following example will illustrate:—

Suppose the total number of chipping & painting workers (excluding Tindals) and Leave Reserve							
workers in the reserve pool as on 1st October 1955	2,000
workers in the reserve pool as on 31st October 1955	1,950
Average strength on the register for the month	3,950
						$\frac{3,950}{2}$	1,975
Total number of man-shifts worked by the workers of the above categories in October 1955	36,000
Total number of man-days of authorised or unauthorised leave taken by the workers	5,250
Number of working days in the said month (31 days of the month less one non-working day)	30
Average number of workers away on leave	5,250
						$\frac{5,250}{20}$	175
Effective strength available during the month	1975-175=1,800
Average employment for the month of October, 1955	$\frac{36,000}{1,800}$	= 20 days.

The same procedure will be followed to arrive at the average employment for the remaining 11 months. Let us assume the figures are as follows:—

October 1955	..	20
November 1955	..	21
December 1955	..	18
January 1956	..	20
February 1956	..	18
March 1956	..	19
April 1956	..	20
May 1956	..	19
June 1956	..	18
July 1956	..	19
August 1956	..	20
September 1956	..	16

TOTAL **228**

The number of days for which wages will be guaranteed for the next 12 months ending 30th September 1957 will be **228**

12 = 19 days
